- b. In claim 1 line 15 after the words "from about 4-7" the words -- wherein said grip includes only two sections of substantial length those being said constant diameter section and said reverse section -- have been added.

3. The following is an examiner's statement of reasons for allowance: None of the prior art discloses or renders as obvious a constant diameter section, a reverse taper section, a ratio of a reverse taper section to a constant diameter section being 4-7, and only two sections of substantial length in addition to the other elements of structure claimed.

The following is a proposed examiner's amendment to overcome the reference of Doyle. The examiner believes in order for the concept of Doyle (Fig. 5C) to work for golf club which is disclosed as a possible grip, section L2 (Fig. 5A) would have to be lengthen to make room for the other hand. The dimensions stated seem to allowed to be modified (Col. 8, Lns. 43-53). The obvious modifications the examiners believes would read on the ratios as claimed. However limiting the claim to having only two sections of substantial length would removed the three section grip of Doyle. Please review this amendment and call back to agree or suggest other changes. Thank you.

Sincerely, Stephen Blau (571-272-4406)
